

**Table C.2:** Exit-confirmation grid: the signal rebuilt with the exit requiring  $K$  consecutive re-steepening months ( $K = 1, 2, 3$ ), identical entry rule. Specification as in Table C.1.

| Exit rule                | ON mo. | Carry spot     |          | Carry total    |          | High-beta spot |          | High-beta total |          |
|--------------------------|--------|----------------|----------|----------------|----------|----------------|----------|-----------------|----------|
|                          |        | $b$            | wild $p$ | $b$            | wild $p$ | $b$            | wild $p$ | $b$             | wild $p$ |
| 1 re-steepening month    | 39     | $-12.14^*$     | 0.059    | $-10.49$       | 0.112    | $-10.35^{**}$  | 0.035    | $-9.39^*$       | 0.051    |
| 2 consecutive (baseline) | 92     | $-12.85^{***}$ | 0.001    | $-11.31^{***}$ | 0.003    | $-7.53^{**}$   | 0.010    | $-6.82^{**}$    | 0.013    |
| 3 consecutive            | 191    | $-3.59$        | 0.161    | $-2.11$        | 0.491    | $-4.23^{***}$  | 0.001    | $-3.58^{**}$    | 0.017    |
